- CBUAE Open Finance

Egypt **then**

Largest Arab market

- Population: 110M
- Banking assets: \$0.5T
- ~19M+ adults without a bank account

We asked 100 UAE expats where money breaks

And heard the same 4 problems

Access

Banks can't see enough to lend

64% account ownership, 21% borrowed formally

Newcomers can't access credit – banks want salary transfer, history, weeks of KYC; they're cut off by design

Plan

Big bills, paid all at once

~88K AED rent/yr · 1–3 → 12 cheques vs monthly pay

Rent deposit, school fees, annual insurance – a full year due in 1-3 cheques, while income arrives in 12 parts

Apply

In-person only

72% mobile · a third to a branch for big credit

Everyday banking moved to the phone – big-bill financing still leans on a broker, a branch and paperwork

See

No single view

Expats in the UAE often hold accounts across 2–3 banks

Salary in one, FX in another, credit in a third

The gap

~32%

of expats are prime, but underserved¹

- Big bills land all at once, income arrives in 12 parts
- Paid in full, your money stops working
- Old splits ignore your real income across banks

Solution

Connect

See

Every account, card and loan, from every bank – on one screen in minutes.

Split

Plan

A school term, split: pay the AED 12,000 cheque, get it back on your account, repay monthly from salary. Works on rent, flights, insurance – and on spend you already made.

Approve

Fund

Decision in seconds, no middlemen. The AI reads your real income across banks instead of a salary letter or weeks of paperwork.

Cross-bank visibility – one licence

A CBUAE Open Finance licence lets Noor connect every UAE bank: read access live today – always with the user's permission.

Cross-bank + cross-border scoring

The model reads real income across every UAE bank plus property and investments back home – a fuller picture than any single bank, or Tabby, can see.

Retroactive on any transaction

“Apply & collect”: the AI spots the AED 12,000 cheque you already paid and offers to split it after the fact – no merchant integration needed.

Every Rail Already Live in the UAE

Monetizing with 1Click Installments

AI analyzes your cashflow & finds purchases to split

Turn installments into goal progress

Split in one tap

Clear terms. No surprises.

Two Revenue Engines

Engine 1 · Subscription

Free 0 AED

→ Multi-bank view, robo advisory, alerts

⚡ Noor+ 49 AED / mo

→ Split big bills · larger limits
→ Bill smoothing
→ Sharia option

Premium 99 AED / mo

→ Larger limits · family accounts
→ Concierge

Engine 2 · Split fee

Fee fixed in dirhams at signing

Fee at AED 12,000

Term	% of ticket	Flat fee
3 mo	~7.5%	AED 900
6 mo	~15%	AED 1,800
12 mo	~30%	AED 3,600

Indicative pricing

Evolving into an Agentic Bank

1 AI-native Installments

RETAIL · B2C

Q4'2026

Aggregate + advise across every bank → split the big bills that hurt

Revenue Streams

Subscription **B2C**
Split flat fee

→ Win the audience

2 Product Expansion

RETAIL · B2C

2027-2028

Own card products, larger limits, more AI-native instruments on partner rails

Revenue Streams

+ card & interchange, deeper split volume **B2C**

→ Deepen the wallet

3 Agentic Bank

RETAIL + SME

2029+

Full-stack money agent, MENA-wide

Revenue Streams

Lending margin + deposits **B2C**
SME banking **B2B**

→ Become the bank

Team with Strong Local and International Banking Knowledge

Sameh Al Qubaisi

Co-founder, Executive Chairman

UAE national, career banker and government official. Built FAB Global Markets (\$3.6B+) and NBAD Asia (\$38M, HKMA license). DG Economic Affairs, Abu Dhabi DED: ADX restructuring, IPO Fund, CEPA Türkiye. Founding board Wio Bank. Founding N24 Capital today

Amro Al Qubaisi

Regulatory Affairs Advisor

UAE national, FSRA-approved Senior Executive Officer (ADGM). Ran end-to-end licensing – FSRA in-principle approval in 8 weeks – and built IC, compliance and audit frameworks to institutional standard. Cleared 22 legacy audit findings at FH Capital, restoring regulatory confidence. 20 years across NBAD, FAB, FH Capital. Certified Investment Fund Director & NED

Max Avtukhov

Co-founder, CEO

Co-founded and led Yandex Lavka - Q-commerce in 16 minutes that revolutionized how people buy groceries, which is relevant to Noor's "Financial Products in 1-Click" – from zero to \$4B+ Revenue. Founded Yango Tech, B2B AI retail platform across 15 countries - and which help Max to see dramatic service gaps in OIC countries. Co-founded YNDX Family – 15K + tech alumni network

Backed by 20+ engineers, designers, and product specialists, all with banking and fintech backgrounds

Our Advisory Board

Pavel Fedorov

Co-founder and Executive Chairman of Salmon, a Philippine consumer-credit platform that raised \$310M – \$160M equity from IFC and Abu Dhabi's ADQ, \$150M in Nordic bonds. Lends through its own BSP-licensed bank and 5,000+ partner stores, built from scratch in three years. Prior: Co-CEO of Tinkoff Group, running international expansion. Earlier: Managing Director at Morgan Stanley, European TMT.

Tomer Michaeli

General Partner and co-founder of Viola FinTech, a cross-stage venture fund that raised \$200M+ and made 37 investments in global fintech, insurtech, and AI. Co-founder of Fundbox, a fintech unicorn (~\$1.1B) that raised \$100M+. Board member behind multiple exits, including Planck (acquired by Applied for \$300M) and Tookitaki.

Alexander Emeshev

Vivid Money co-founder – European neobank, built on Solarisbank infrastructure and Visa. Prior: in charge of new product development at Tinkoff Bank from 2014. Earlier: Executive Director and Head of Customer Loyalty at Kazakhstan's Kaspi Bank

Vlad Tropko

Founder & CEO of AmberVale Capital, an investment firm acquiring and scaling established UK businesses. Former Partner at Launchbay Capital (\$300M+ AUM), with a track record of 50+ transactions and 5 exits in 3 years. Early investor in Zipline (now valued at \$7.6B), Quantenna (acquired by ON Semiconductor for ~\$1.1B), monday.com (publicly listed), and Ably (\$700M+ valuation).

Valeriya Allakhverdiyeva

Chief Risk Officer at Tabby, built the entire risk and collections function from an early stage to company's growth to a \$3.3B valuation across MENA market. Owned credit decisioning, fraud, and collections on \$10B+ in annualized volume while keeping the business profitable. Previously Head of Risk (Mexico) at ID Finance, cutting scoring costs by 30%.

Revenue Overview

Additional Materials

Roadmap to a Full Open Finance Platform

Noor scores the whole financial picture

01

Basic financial view

Market data

DATA AVAILABLE

- Transaction statements
- Application data

WHAT NOOR LEARNS

Initial view of income, spending and affordability

CUSTOMER / CREDIT OUTCOME

Illustrative entry access (e.g., up to AED 1,000*)

02

Connected financial view

Connected data

- Open Finance: consented live access to accounts across UAE banks
- AECB obligations and arrears

Fuller cash-flow position plus existing liabilities

Improved eligibility and higher potential limits

03

Behavioural view

Product behaviour

- PFM behaviour, device intelligence and digital footprint
- Connected sources: bills, receipts, remittances, e-commerce and everyday apps

How the customer manages money beyond traditional banking data

Better risk-based pricing and more relevant offers

04

Proprietary credit view

Proprietary lending data

- Internal repayment history
- Observed lending behaviour with Noor

Actual credit performance earned only through lending

Personalised access based on proprietary insight

The Product Is the Marketing

Partnerships

Split lives inside property finders, classifieds, furniture, schools, insurers – at the moment the big payment happens

Risks and How We Manage Them

Competitive entry

High

Global entrants –
Revolut, Cleo-class

PFM apps – Drahim,
Malaa, Botim GPT

FAB & ADIB single-bank AI
assistants locked to one institution

✓ Closed-ecosystem DNA: UAE
rails, WPS salaries, Arabic,
cheque mechanics, local credit
data

✓ They see money but can't move
it: no execution layer, no lending
rail, no OFP perimeter

✓ Built ground-up – incumbents
can't retrofit on legacy core

Bank Partnerships Failure

Med

- Open Finance mandate guarantees
API access by Sept 2026
- Sameh Al Qubaisi has board-level access
via partner banks
- Diversified across multiple bank partners

AI Execution

Med

- "AI banking" is easy to pitch, hard to ship – and we've done it
- \$4B+ multi-bank marketplace in 10 months across 30+ banks (Alex, CTO)
 - Kazakhstan's first Islamic digital bank (Ksenia, CPO)
 - FAB Global Markets at \$1.9B+ (Sameh, Co-Founder)

Everyone scores your salary.

Noor scores your whole financial life.

The market today

- A salary certificate + a bureau score
- One bank's view of one paycheck
- Expat files thin or empty – declined or under-limited

The Noor engine

- ✓ Balances & assets across every bank
- ✓ Income patterns – salary, side income, remittances
- ✓ Spending behavior & live obligations
- ✓ Updated with every transaction – not once a year

What the engine unlocks

Thin files become creditworthy

Real cash flow substitutes the history expats couldn't bring – and builds the credit file no one else builds for newcomers

Bigger tickets, priced lower

Rent financing costs the tenant 5–15% today because incumbents score blind and carry the book. Whole-person scoring compresses the risk premium

Offers we initiate

The engine picks whom to offer, what and when – risk selection by data, not application queues

Long-Term Moats

Day-1 advantages

Win the race

- Agentic development & operations – 3–4 yr replication gap
- AI-native cost structure – CAC & cost-to-serve profitable in the expat mass segment
- Capital-light partner-bank model – lending in months, no core-banking burn
- 24/7 agentic UX, Arabic + English, full audit-trail of reasoning

Moat vs incumbents

Even Revolut needs 3–4 yrs to re-architect legacy processes into agentic ones; branch-and-headcount economics can't serve the expat mass segment (Nubank playbook); closing the Open Finance data loop takes 2–3 more yrs.

Compounding moats

Keep the lead

- Multi-bank cash-flow dataset + repayment data – via Open Finance, Noor sees the user's full financial life
- Switching costs – Noor runs the user's financial operating system
- Bank-partner rails, track record & regulatory relationships
- Distribution – classifieds/ecom/travel, word-of-mouth

Moat vs MAL & other AI-natives

MAL (\$230M seed) builds a full bank: 12–24+ months and hundreds of millions before the product works. Noor lends on partner-bank rails in months; a focused wedge (rent, school fees, flights) beats a broad multi-country platform
